

Offering the Europe's largest CBD White-label ranges with unlimited options.

We are proud to encourage all types of businesses to expand their existing range, or to start a brand-new enterprise.

Whether you want to emulate other brands or create an entire new range never seen on the market, we can provide a Turn-Key solution. Our dedicated research & development team are consistently taking on new challenges, allowing us to experiment in the natural sciences, expanding both our knowledge and capabilities. This gives our existing and future clients access to resources and a knowledge base that isn't readily available with other service providers.

By keeping our minimum order quantities low, we actively encourage small businesses to invest in this massively exciting industry which has seen unparalleled growth. This in turn allows innovation to grow within the industry.

All of our products are manufactured in-house via our ISO standard clean rooms.

Our expert R&D team are able to research, replicate and create almost any CBD product in the market.

Just the tip of the iceberg!

Please note, we have only included a selection of popular products within this brochure. We are able to create a large number of other products which are not on this list. Everything we manufacture can come in any flavour, colour, infusion or packaging. The only limit is your imagination.

We are also able to produce non-CBD versions of almost any product. Our popular non-CBD products include supplements, nootropics, cosmetics and more.

CBD Type

All of the products that we manufacture are available in isolate, full-spectrum, cold pressed or broad-spectrum CBD. However, we do recommend the best option for each product to obtain the optimum result.

As well as CBD, each product can be made with any other cannabinoid type, such as CBG, CBC, etc. or a combination of compounds.

Bulk Buy

All products that we whitelabel can also be purchased in bulk without individual packaging.

Supplement Infusion

Our products can now be infused with Nootropics, vitamins, functional mushrooms and more. This includes ashwagandha, turmeric, sea moss, Lion's Mane, chaga, sage, vitamins (D, E, Omega etc.) and hundreds more...

Product Liability

All of the products that we manufacture and supply are covered under our comprehensive product liability insurance.

For pricing and all whitelabel inquiries contact whitelabel@jm-wholesale.co.uk or 0116 273 1706 (Option 3)
